TECTONICA A MEMBER OF SUPACAT TEAM AUSTRALIA

Tectonica Australia Pty Ltd is proud to be a member of Supacat Team Australia, which will work in partnership to deliver the JP2097 Ph 1B (REDFIN) program efficiently, on a best value for money basis, within Australia.

Supacat has offered its proven Special Forces HMT Extenda vehicle, the Special Forces vehicle of choice. Developed for use by Special Forces, the Extenda provides a unique, high performance 'convertible' platform.

Using the HMT variable height air suspension system, Extenda matches the capabilities of the 400 and 600 series sister platforms yet can be configured as a 4x4 or 6x6 to meet the operational need by fitting or removing a modular, self-contained third axle unit.

Like the other HMT series variants, the Extenda can be supplied with an optional mine blast and ballistic protection kit and can be fitted with a variety of mission hampers, weapons, communications, ISTAR and force protection equipment to suit a wide range of operational roles.

Tectonica's proven vehicle integration, prototyping and electro-mechanical manufacturing capabilities will be available to Supacat Team Australia during both the Prototype Development & Evaluation and Acquisition phases, helping to deliver the Australian Army with the very best capability available.

About Tectonica Australia

Tectonica Australia is a leading Defence and Security systems integrator. Since 2002, Tectonica has developed fully integrated systems for armoured vehicles, ground stations and soldiers.

In partnership with local and international organisations, Tectonica offers a comprehensive range of Defence and Security solutions in the areas of Protected Navigation, Portable Power, Force Protection and Crew Survivability.
